

Jeffery Patterson

Software Engineer | Full-stack applications, AI integrations & developer tools

Los Angeles, CA / designframebuildweb@gmail.com / 951-581-6263
github.com/jpatterson933 / linkedin.com/in/jefferywpatterson / Portfolio

Full-stack engineer at AE Studio building web platforms, desktop apps, and AI integrations. Experience spans assessment systems, workflow automation, and open source developer tools.

EXPERIENCE

Full Stack Engineer Aug 2023 - Present
AE Studio | Los Angeles, CA

- Build client platforms and internal tools across education, AI, and business operations, from React interfaces and APIs to databases and deployment.
- Developed a QTI 3.0 assessment API with bidirectional JSON/XML conversion, schema validation, student-response processing, and multi-tenant MongoDB storage.
- Built a cross-platform command launcher with a shared plugin system and service integrations across Electron desktop, Capacitor mobile, and web applications.
- Implemented PostgreSQL and MongoDB services, Redis caching, background jobs, and webhook pipelines to connect applications and automate team workflows.
- Created dashboards and developer tools for website audits, traffic analysis, and build inspection; deployed applications on AWS and Railway.

Full Stack Development Teaching Assistant Feb 2023 - Aug 2023
UC San Diego & edX | Remote

- Mentored 30+ students in React, Node.js, Express, and databases; guided projects from concept to deployment through debugging, code review, and Git workflows.

SELECTED PROJECTS

aiseo-audit Open source
Built a deterministic CLI and typed API that evaluate AI search readiness and produce actionable reports without AI API calls.

Fathom MCP Server Open source
Connected AI assistants to meeting recordings, transcripts, and summaries through Model Context Protocol, with OAuth, encrypted tokens, and per-user access controls.

Fabulist Desktop application
Built a writing workspace with Markdown editing, anchored comments, reviewable AI edits, Git history, and reusable agent plugins.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, C#, SQL, HTML, CSS
Applications	React, Next.js, Node.js, Express, ASP.NET Core, Electron, Capacitor
Data & AI	PostgreSQL, MongoDB, Redis, Drizzle ORM, BullMQ, OpenAI, Anthropic, MCP
Delivery	AWS, Docker, Railway, GitHub Actions, Git, Vitest, Zod, k6, OAuth 2.0

EDUCATION

UCLA, B.A. Political Science (2016) | **Santa Monica College**, A.S. Computer Science (2022)
UCLA Extension, Full Stack Developer Bootcamp (2021); Cybersecurity Certificate (2023)
